# Modernize Your Supply Chain Operations With Itopia®

Discover how the Itopia® low-code application platform
can be your foundation for supply chain success

tecsys™

Is legacy technology holding you back?

Today's distribution leaders need flexibility and visibility across systems to keep up with changing market demands. But organizations continue to rely on legacy technologies that fail to meet those requirements. These traditional environments often have siloed applications that do not communicate with one another, leaving gaps in data and processes.

This lack of integration and customization can significantly hinder progress as a result.

Challenges from a lack of integration and customization

Inflexibility to adapt to market changes quickly

High **complexity and costs** of system integration

Limited **visibility** across the supply chain

Difficulty in **scaling** operations to meet demand

A modern, low-code platform empowers supply chain leaders to adapt their operations more effectively, overcoming these legacy obstacles and preparing them for future challenges.

Itopia® sets you up for **operational success**

The Itopia® platform from Tecsys can become the central hub for your supply chain operations, helping you meet the agility, efficiency and scalability requirements of today's supply chain ecosystems. It integrates inventory, warehouse and distribution operations into a single environment, fostering greater flexibility and control. Its low-code functionality makes it easier to configure and customize, allowing you to expand capabilities as your business needs change as well.

Why choose the **Itopia® platform**?

Tecsys' Itopia® platform, on which the Elite™ suite of supply chain applications is built, offers a wide range of practical benefits to meet your operational needs.

1.

Accelerate and enhance your supply chain operations with more efficient and future-ready business processes.

- Integrate systems, applications and processes to remove silos and interoperability.
- Grow and adapt with scalable infrastructure, overcoming traditional software limitations
- Customize workflows to meet business needs and enhance operational efficiency.

Benefits:

- Reduce unnecessary operational costs.
- Improve decision making with increased visibility.
- Adapt to market changes for a competitive edge.

2.

Enable continuous improvement with a low-code WMS designed for modern distribution environments.

- Gain real-time visibility into inventory levels, orders and shipments from any device or location.
- Automate warehouse processes to reduce errors and improve productivity.
- Manage multiple warehouses, fulfillment centers and distribution channels from one platform.

Benefits:

- Support growth while reducing overhead costs with scalable infrastructure.
- Enhance real-time collaboration among suppliers, distributors and customers.
- Optimize inventory levels and reduce waste with predictive insights from advanced analytics.

3.

Ensure security and compliance across your supply chain with built-in security features and compliance tools.

- Leverage Itopia®'s comprehensive security framework to protect sensitive data and operations.
- Simplify regulatory compliance with built-in features for reporting and access controls.
- Implement best practices for data privacy and IT governance integrated into the platform.

Benefits:

- Mitigate risks and reduced compliance costs.
- Improve data security and protection against cyber threats.
- Provide peace of mind for customers, partners and regulators.

With Itopia®, you can improve:

Integration
Establish interoperability with existing systems, applications and partners.

Agility
Quickly adapt processes and workflows to meet changing market demands.

Visibility
Gain a comprehensive view across your supply chain environment.

Scalability
Scale operations to support business growth without hurting performance.

Low-Code Application Platform (LCAP)

As an LCAP, Itopia® simplifies configuring and customizing warehouse systems. Adapt its metadata and tailor processes to improve operations and respond to market changes. Customize permissions so citizen developers can collaborate safely and effectively. Get a unified, control tower-like view that turns data into actionable insights. Scale its architecture without bottlenecks as your business grows.

Amazon Web Services (AWS)

AWS provides Itopia® with continued access to the latest technology for security, innovation, and resilience. This foundation supports geographically distributed disaster recovery and global data center options for localized, reliable services, and 99.5 / 99.9% uptime at virtually any location. Tecsys maintains a strong and collaborative technology partnership with AWS as well.

Upgradeability

Itopia® makes upgrades easy, giving you continued access to the best features, capabilities, and security as new features are delivered to you. Thanks to its LCAP architecture, your customizations are preserved and improved with each new upgrade. This ensures you have access to the latest features in your custom environment and supports continuous improvement of your supply chain operations.

"

"We have journeyed together with Tecsys for nearly two decades, and in them we find a true partner in pursuit of supply chain excellence. We coordinate a deeply complex network of high-volume manufacturers, artisanal vendors, multinational retailers, standalone stores and direct-to-consumer channels, and Tecsys has given us the tools to orchestrate these moving parts on a global scale."

Rolf Hagen Jr
President and CEO, Rolf C. Hagen Inc.

About **Tecsys**

Since our founding in 1983, so much has changed in supply chain technology. But one thing has remained consistent across industries, geographies and decades — by transforming their supply chains, good organizations can become great.

Our solutions and services create clarity from operational complexity with end-to-end supply chain visibility. Our customers reduce operating costs, improve customer service and uncover optimization opportunities.

We believe that visionary organizations should have the opportunity to thrive. And they should not have to sacrifice their core values and principles as they grow. Our approach to supply chain transformation enables growing organizations to realize their aspirations.
