# How To Implement a **WMS in 28 Days**

A warehouse management system implementation does not need to take months. At Tecsys, we use this plan to consistently go live with customers on our Omni™ WMS in a total 28 days of effort.

Understand your business

- Current operation walk through
- End-to-end solution and project review
- Implementation role assignment
- Process mapping and system configuration review

Build the system, build the integration

- Master data migration and initial load
- System configuration
- End-to-end system testing - phase 1
- Interface testing and data validation

Test the system and processes, train key staff

- Boardroom pilot
- End-to-end system testing - phase 2
- Key expert training and review
- Go-live planning

Roll out, train remaining staff and go live

- End user training
- Inventory count and cutover
- Go-live support

Week 1   Week 2   Week 3   Week 4
